Great teacher :)

Interesting course. A bit mentally fatiguing, but that's rather unavoidable for this subject.

Funny, engaging personality. Helped make the class and subject matter a little more interesting.

Class discussions and the online discussions were very helpful it was a great class.

Great professor, as well as a good course. Dr. Gould made class fun, & taught very stimulating ideas, which now has me more interested in this topic.

This was a very interesting & exciting course. Both the material & the teacher were engaging and I thoroughly enjoyed taking this class.

Dr. Gould is very helpful and enthusiastic with the students. I just was not interested in the subject of this course but his teaching made it more enjoyable.

This course was a far more positive experience than I had hoped for after having completed the first two courses in the LSFY sequence it proved to be very intriguing and thought provoking.

Although I initially did not enjoy this course because it was based heavily on philosophy, in the end I thoroughly enjoyed the course as a whole. The professor, Dr. Gould, made it clear that he actually cared about us and the topic of the course.

This course was very difficult for more for several reasons. I had no previous knowledge of artificial intelligence. Also, I am not a very logical/mathematical person. The material taught in this course didn't make sense to me at all—however, Gould tried his very best to be clear and thorough. I enjoyed the topic, but overall, this was my hardest class this term.

Definitely some of the most interesting class discussions I've had were in this class, although the weight of grading was not favorable to some students. Class participation is 15% of your grade and not everyone will speak every single day. I also wasn't the biggest fan of the forum. But overall, I really enjoyed this class.

At first I was just very uncomfortable with the class, but now I am very glad I took it. I like your teaching style and how you scheduled the work in ways that helped me stay on-top of it and get the most out of the material.
